

# How to Measure A Circle Using the SmartMicroScope 5M on Mac

Connect the SmartMicroScope 5M to the USB port and then open the software

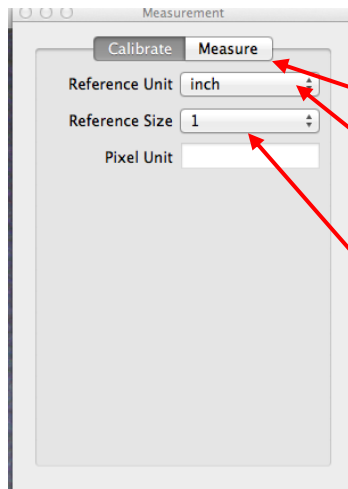

Place the SmartMicroScope 5M on a ruler and adjust the focus knob until the image is sharp.

1. Using the function keys at the side of the Viewer, Click on the Measurement

2. From here, The Measurement Window will Open

**You must First Calibrate to get an accurate measurement:**

3. Click the Calibrate Tool
4. Change the Reference Unit to appropriate measurement (inch, mm, mil)
5. Change the Reference Size to 10, depending on the measurement

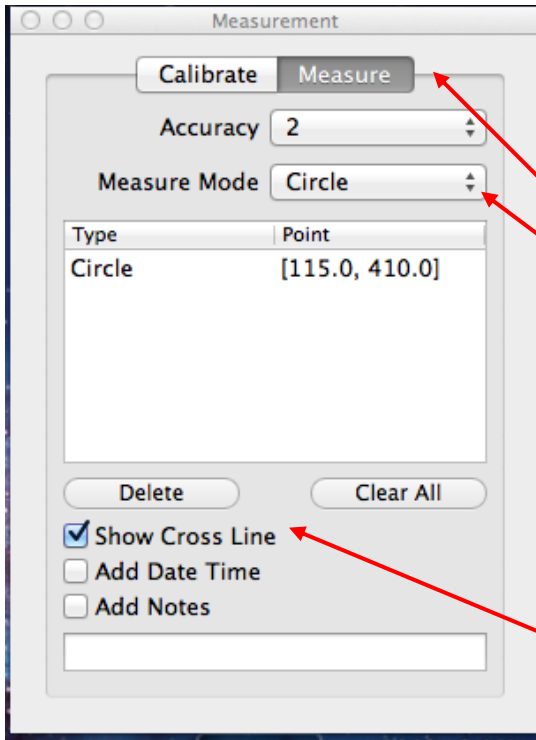

6. Using the mouse click on the Left side of the ruler and drag to the right
7. Release the mouse

**Calibration is complete**
