

How to Measure An Angle Using the SmartMicroScope 5M on Mac

Connect the SmartMicroScope 5M to the USB port and then open the software

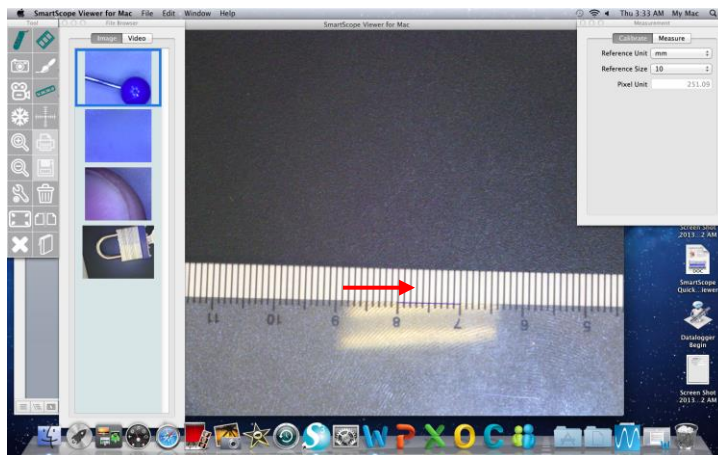

Place the SmartMicroScope 5M on a ruler and adjust the focus knob until the image is sharp.

1. Using the function keys at the side of the Viewer, Click on the Measurement Tool
2. From here, The Measurement Window will Open

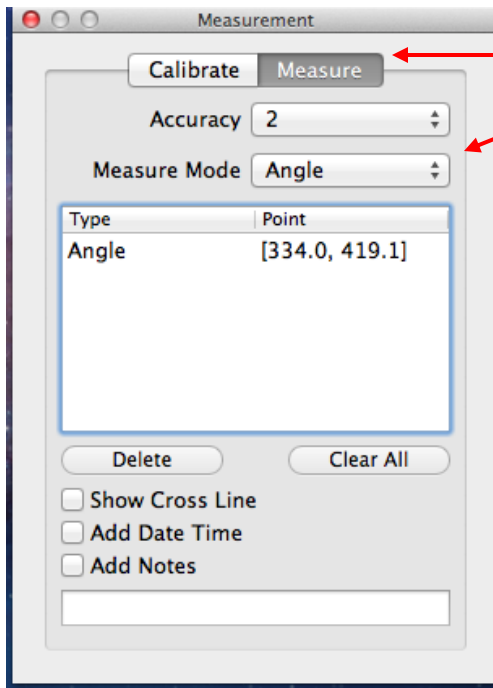

3. Click the Calibrate Tab
4. Change the Reference Unit to appropriate measurement (inch, mm, mil)
5. Change the Reference Size to the appropriate number

6. Using the mouse click on the Left side of the ruler and drag to the right to the appropriate distance
7. Release the mouse and your calibration is complete
