

Looking for Grant Funds for your STEM Classroom?

SmartSchool Systems has partnered with Donors Choose, Amazon and several corporate donors to offer hands-on STEM tools for K-12 public classrooms.

The application process is quick and relatively painless...

- 1. Visit the [SmartSchool Systems Amazon site](#) to determine which products would most benefit your students (Only Amazon Prime items are eligible for Donors Choose). Determine how and why it will be so powerful in your classroom.**
- 2. Visit [donorschoose.org](#) and look at the proposals listed. Find science projects and read the projects that were fully funded and ones that have little funding with little time remaining.**
- 3. Determine the number of students that will use the materials. Make sure that number is in the proposal. The bigger the number, the better the chance of it being funded. Share with another teacher if necessary.**
- 4. Write your proposal considering the ones that were funded and the ones that were not. Be sure to include the terms “STEM”, “science” and “SmartSchool Systems” in your proposal.**
- 5. Let your administrator know you wish to submit a project.**
- 6. Submit your proposal.**
- 7. Share it through social media and with parents. Our corporate partners tend to fund projects that have at least one donation, but more is better. We cannot guarantee your project will be funded by one of our corporate partners, but several have “funding days” where they go in and fund multiple projects.**
- 8. Send an email letting us know you posted a project: support@smartschoolsystems.com**
- 9. Check back often and send thank you notes to those who donate.**
