SmartSense VISION

datalogger

Standalone
record · save · display · analyze

With a PC
control from your computer

With a Projector
simple plug and display

VISION completely replaces the standard PC & Logger combination - a huge cost savings!
(It can still be used as both a remote data logger and with a PC when required.)

- Touch screen graphic display
- Plug directly into a data projector for entire class viewing
- Instant on (no waiting for it to boot up)
- Long battery life (8 hours of interactive use or up to 14 days of remote data collection)
- Built-in SmartSense software very similar to the PC version
